Superior CrMo Alloy results in:

- High ultimate and yield tensile strength
- Superior modulus of elasticity
- Shear modulus far exceeding competitor's axles
- Accepts Full-circle Clips

EXCLUSIVE Torque Equalizing Diameter Profiles allows "short" side axle to have similar ductility or "give" as the "long" side, creating a more reliable axle assembly. Patent Pending.

NEW!! Super U-Joint Option

exceeds all others in strength and reliability. A perfect match for our Super Alloy axle shafts.

REPLACEMENT SHAFTS

Replacement shafts are designed to meet Original Equipment requirements at an economical price.

- Sold Assembled!
