BY USE OF THIS PRODUCT, THE USER ACKNOWLEDGES:

- That personal safety products are only part of a complete safety system that includes the vehicle, the race track, and the operating conditions at the time of use.
- That personal safety products are not designed to provide the same level of performance or protection throughout the entire product. Different parts or areas of the product may provide less protection even though they may appear the same.

THE USER ACKNOWLEDGES THAT MOTORSPORTS ARE DANGEROUS. THERE IS A SERIOUS RISK OF INJURY OR DEATH, EVEN IF THIS PRODUCT IS USED CORRECTLY. NO PERSONAL SAFETY PRODUCT CAN PROTECT THE USER FROM INJURY OR DEATH.

SNELL 2010 REQUIRES TOUGHER TESTING STANDARDS.

Read What This Means for You

At Simpson we work tirelessly to ensure the highest level of racing safety, and tougher testing standards for Snell 2010 Certification means a safer helmet for you. In addition to the new Snell 2010 Certification, our new line showcases many innovative features resulting in improved shield and helmet fit. These innovations ensure a higher level of comfort and peace of mind. We are offering up this new level of helmet comfort, because, at Simpson, our racers' comfort is second only to their safety.

Improved Helmet Fit

Expanded liner sizing, new for this year, makes a more accurate fit of hat sizes 6 $\frac{1}{4}$ to 8 $\frac{1}{4}$ possible. With form-fitting cheek pads cupping each driver's face a thicker, plusher interior, and more accurate sizing you can count on a more comfortable fit.

Improved Shield Fit

This year's helmet improvements also carry over to shields. You'll find with many of our new helmet designs, a recess in the shell has been added and refined creating 100% shield seal, and just as importantly, a secure fit. Completing the seal is a new and improved eye-port foam.

At Your Fingertips

Browse the catalog to see all of the new features of our new Snell 2010 Helmet Line. Call 1-800-654-7223 now or visit our website www.TeamSimpson.com to order.

What's the difference between SA2005 and SA2010 Standards?

This year we utilized graduated head form drop masses. That means the drop masses in the impact testing are dependant on head form circumference. This gives us more "real world" data in measuring what kind of impacts a particular head size would be more likely to encounter on impact.

Don't be a Stranger

Periodically we'll post images and special videos from the team explaining the new helmet line, so be sure to check out the Simpson website and our Facebook page regularly.

SNELL 2010

Timeline

Snell 2010 rated helmets are available beginning October 1, 2010. Snell 2005 rated helmets will continue to be available while supplies last. Some sanctioning bodies will allow racing with a Snell 2005 helmet until 2015 but it is a good idea to check your rulebook for specific dates as they do differ in some forms of racing.

For additional information about Snell 2010 Standards, visit the Snell Memorial Foundation website at www.smf.org.

About Snell Standards

The Snell Memorial Foundation was named for William "Pete" Snell. His helmet failed to protect him in a 1956 crash, and, as a result, he died from massive head injuries. Snell issued its first safety standard in 1959.

They are the world's only independent, non-profit organization dedicated exclusively to helmet safety standards, and manufacturers voluntarily submit their helmets for testing. To be Snell certified means knowing how serious helmet safety is, and knowing how seriously Snell takes it.

Snell uses science, technology and established fact to create its standards. If a subject is not backed up by verifiable research and repeatable studies, they will not use it for a helmet you, or your loved ones, will wear.

THE TEAM BEHIND FEWER POUNDS AND MORE PROTECTION.

"IT IS YOUR HEAD AND YOU HAVE ONLY ONE. SAFETY SHOULD BE A PRIORITY. WE TAKE PRIDE IN THE QUALITY OF OUR HELMETS AND THEIR ABILITY TO PROTECT YOU."

*ED ROTHSOCK, SIMPSON TEAM MEMBER,
36 YEARS IN THE HELMET INDUSTRY.*

HELMETS

HELMETS

HELMET FIT:

A correctly fitted helmet should feel like an even amount of pressure is being exerted around your head and cheeks. But, helmets break in, so it should fit as tight as you can comfortably wear it. Once fastened, you should **NOT** be able to pull it off your head in any direction. Attention first-time helmet buyers: If your helmet is loose at all, and doesn't fit well, it **CANNOT DELIVER** the best protection. A helmet's strict safety standards can be compromised after only one impact collision. If the integrity is in question, send it back to us for proper inspection.

INCHES	20	21	22	23	24	25									
CENTIMETERS	51	52	53	54	55	56	57	58	59	60	61	62	63	64	65

COLOR IS BIG FOR 2011

HELMET COLOR SELECTION

Many custom colors only \$25.00 additional charge. Simpson's custom color paint options let you match any uniform or any car paint scheme. Our extensive helmet manufacturing and research facility in New Braunfels, Texas gives us the capability to offer a wide array of paint colors for many of our most popular Snell rated helmets. The colors may change, but the one thing that remains constant is Simpson's commitment to racer safety.

MADE TO ORDER CUSTOM FIRESUITS

Custom Firesuits are Made to Order, per your specifications. Important tips listed here. Please read carefully before reviewing this section.

SUIT TYPE AND STYLE

The suits pictured in our custom suit section are here to show you the multitude of style and material options that are available. You are not limited by any of these designs, in any particular suit style. However, if you like a particular design that you see, call 1-888-672-SUIT (7848) and our customer service staff will assist you.

COLORS

Color options and combinations are endless.

OPTIONS

Simpson Custom Firesuits are available in single layer, 2 layer and 3 layer suits as well as drag racing suits.

OUTER FABRIC CHOICES

TITANIUM, NOMEX®: Light-weight fabric. High luster finish. Excellent choice for custom design incorporating embroidery and trim.

DIAMOND: Light-weight durable fabric; offers superior fire protection with excellent breathability, with a subtle sheen. Diamond is available in a wide array of colors.

SIGNATURE KNIT, NOMEX®: A light-weight comfortable fabric. Offers superior fire protection and a subtle stretch for added mobility. Signature knit is currently available in Black, Blue and Red.

SATEEN: Semi-shiny woven fabric with a relaxed, soft and supple feel, available in a wide variety of colors.

GABARDINE III: Durable fabric, soft hand, tightly woven, available in a wide variety of colors. Lastly, Simpson firesuits are made in the USA. We believe they are among the best in the industry, each crafted with pride and with your safety in mind.

RETURNS

Please make sure all logo placement, colors and sizes are correct on your custom order before placing it. Sizing and design errors on custom apparel will be fixed at no charge if the error was made by Simpson, otherwise charges will incur.

2011 NEW ATTENTION TO DETAILS

NOMEX® TECHNOLOGY

NOMEX® AND RACING GEAR: A WINNING COMBINATION

Performance and confidence—racing professionals can't have one without the other. That's why they wear racing gear of DuPont™ Nomex® brand fiber. It manages extreme heat, yet still delivers incredible comfort, style and durability—giving them the performance they want with the peace of mind only Nomex® thermal technology can provide.

NOMEX®: THE PROTECTION RACING PROFESSIONALS TRUST

DuPont™ is proud of its innovations that enhance the high-performance world of professional racing. DuPont™ Nomex® brand fiber is the industry leader in providing thermal protection against the ever-present danger of flash fires at the racetrack. That's why almost all of the drivers competing in NASCAR, IRL, NHRA, CART and USAC events wear flame-resistant racing suits made with Nomex®. And they're not alone. Nearly all the pit crews, rescue teams and track officials who work in the presence of potential flash fires also depend on Nomex®, because it protects them from intense heat and flame, provides the valuable seconds they need to escape fires and minimizes the potential for burn injury.

WHAT IS NOMEX®?

Advanced thermal technology was born more than 30 years ago when DuPont™ scientists created a fiber with an extraordinary combination of high-performance heat and flame-resistant properties, as well as superior textile characteristics. This high temperature resistant, man-made fiber will not sustain combustion in air and will not melt in the presence of flames. When exposed to intense heat, Nomex® carbonizes and becomes thicker to provide a protective barrier between the heat source and the skin. No amount of laundering, or wear and tear, can remove the flame resistance from apparel made of Nomex® brand fiber. This performance gives the wearer more time to escape the dangers of a life threatening flash fire. The inherently flame-resistant properties provided by Nomex® mean that those who rely on it are safe and protected from the hazards they face on the job every day. It is that knowledge and sense of security that enables them to concentrate on the task at hand, and to make a substantial contribution to things that are important in our every day lives.

Professionals all around the world count on their skills and savvy to prevail in the face of danger. That's why in industries like firefighting, race car driving, power generation and plant operation, professionals rely on Nomex® as the vital link between what is possible and what is accomplished in essential thermal protection. Nomex® takes the heat head on and enables the wearer to focus on the task at hand. In some jobs, what you wear can save your life. With its proven reliability and heritage, you can be secure knowing that Nomex® will perform when it needs to so you can perform when you need to.

FABRIC CARE

Both dry cleaning and washing are acceptable methods of cleaning and caring for your suit. As with any fine garment, use caution to protect the many intricate logos and colors. Following an especially grueling and grimy dirt track race or when dry cleaning just isn't an option, we recommend the Molecule Labs® line of fabric care products, distributed solely by Simpson. Please note, certain light to bright color combinations and intricate trim and embroidery applications increase the risk of dye bleed when washing. Wash and dry or dry clean your suit at your own risk. Be sure to fasten all zippers and Velcro closures. Remove laundered suits from the washer immediately after the wash cycle is complete and hang to air dry.

* Molecule Labs Fabric Care - see pg.48

MEASURE FOR A CUSTOM FIT BUILD TYPE

- ADULT YOUTH

PLEASE MEASURE ACCURATELY WITH CLOTH MEASURING TAPE. DO NOT ADJUST MEASUREMENTS OR MAKE ALLOWANCES. USE SPECIAL INSTRUCTIONS FOR ANY SIZING COMMENTS.

A. SLEEVE — Measure from center back where collar hits spine, behind elbow, to wrist, with elbow bent and arms forward.

B. CENTER BACK — Measure from center back where collar hits spine, to waist.

G. SHOULDERS — Measure across back of shoulders from sleeve.

M. RISE — Measure from front of waist through crotch to back of waist.

KEY	DESCRIPTION (USE CLOTH MEASURING TAPE)	MEASUREMENTS INCLUDE
A	Neck to wrist. Measure from center of neck (bone) to wrist.	
B	Center back length. Measure neck (bone) to waist (C).	
C	Natural waist circumference. Measure across navel & level across back.	
D	Chest circumference. Measure widest circumference.	
E	Inseam. Measure bottom of rise to ankle (bone).	
F	Collar bone to where crotch seams meet.	
G	Shoulder width. End of shoulder to end of shoulder.	
I	Measure circumference of waist at beltline where pants are worn.	
J	Hip. Measure largest circumference around hips.	
K	Thigh. Measure 7" below crotch.	
M	Rise. Measure front to back waist. For 1 piece suit, same measurement points as C. For 2 piece suit, same measurement points as I.	C I
N	Neck size	
O	Height	
P	Weight

CUSTOMIZE YOUR DESIGN AND FIT WITH OUR FULLY SUBLIMATED KART SUIT

FULLY SUBLIMATED KART SUIT

CODE: MK.TS Sublimated Kart Suit, 1 piece PRICE: \$399.00
 CODE: MT.KSJ Sublimated Kart Jacket PRICE: \$179.00

Sublimation is a process where we print directly on the suit fabric, eliminating the need for embroidery. This means your suit can have endless designs limited only by your imagination. Sublimation is a vivid color process that looks as good at the end of the season as it did when it was new. Customer to supply Vector artwork for sponsor logos.

GLOVES

GLOVES

GLOVE SIZING INFORMATION

5 to 6	XX Small
6 to 7	X Small
7 to 8-1/2	Small
8 to 9-1/2	Medium
9 to 10-1/2	Large
10 to 11-1/2	Extra Large

To find your glove size in inches, measure around the largest part of the hand over the knuckles while making a fist, excluding thumb.

CARE & MAINTENANCE: Put your gloves on. Put your hands in a mild soapy water, or Castile soap. Then "wash" them by opening and closing your fingers under water. Squeeze dry while wearing them. Then hang them to drip dry.

OFF ROAD RESTRAINTS PERFORMANCE RACING SERIES

LUCAS OIL AND TORC SERIES

D3 RESTRAINT

Exclusively from Simpson, the D3 provides the ease and convenience of a sewn in harness without the harness being sewn into the lap belt. The D3's unique design eliminates 2 links while still allowing the shoulder harness to be joined closely at the buckle, emulating a 5-point latch and link system.

CODE: 3B33NI 3"x 3" Latch & Link
with D3 Hardware

PRICE: \$139.95

- D3 is not SFI approved
- Drop forged alloy steel with cadmium plating
- Polyester webbing

RESTRAINT SYSTEMS & WINDOW NETS PRODUCTION INFORMATION

ANSWERS TO COMMON QUESTIONS ABOUT RESTRAINT SYSTEMS:

Q: WHY DOESN'T SIMPSON STOCK BELTS AND RESTRAINT SYSTEMS?

A: Every system is made when ordered to insure a current SFI date.

Q: HOW OFTEN SHOULD I INSPECT AND/OR REPLACE MY BELTS AND RESTRAINT SYSTEMS?

A: Simpson recommends replacing your restraints every two years. You should inspect your belts and restraints before every use. Replace belts and restraints that have nicks, cuts, excessive wear, fraying and/or have been exposed to harmful chemicals or the environment. Proper restraint is a very important factor in safety. Replace any belts that experienced a crash or an event other than normal use. Do not use the restraint system again, even if it appears OK. We recommend (and some Sanctioning Bodies require) the belts be replaced two years after the date stamped on the SFI tag. Consult your Sanctioning Body for more information.

DO NOT USE THE RESTRAINT SYSTEM AGAIN AFTER AN IMPACT. EVEN IF THERE IS NO VISUAL DAMAGE.

If in doubt, return the restraint system to the Simpson factory in New Braunfels, TX for inspection. Keep the webbing and hardware free of exposure to chemicals, moisture, weather or conditions that could damage or compromise the strength of the system.

Q: WHAT IS THE ADVANTAGE TO "PULL UP" OR "PULL DOWN" TYPE BELTS?

A: What you use is a matter of personal preference and the equipment you're using. For example, does the belt go through the seat? Will you adjust it or will someone on the crew? What hardware works best with your set up? Bolt-in, Floor Mount or Wrap Around? The "Pull up" belts are 62" in length. The "Pull down" belts are 52" in length.

Q: HOW DO YOU CLEAN THE RESTRAINT WEBBING?

A: Clean with a mild detergent and damp cloth. **DO NOT USE** chemicals or solvents. Allow to air dry completely. All restraint systems and window nets, including webbing and hardware, should be checked for wear, fatigue and fastness regularly.

Q: ARE SIMPSON RESTRAINT SYSTEMS DOT (DEPARTMENT OF TRANSPORTATION) APPROVED?

A: No. Simpson restraint systems are SFI approved and dated.

The kit includes an extensive assortment of emergency care items including assorted adhesive strips, sterile gauze pads, insect sting relief pads, burn cream packets, latex free vinyl gloves, premium gripper scissor, a survival wrap, tweezers and more.

GAVIN CHILD SAFETY SEAT

CODE: 93000 | PRICE: \$229.95

Designed to care for your child from 20-100 lbs. The Gavin racing themed 3-in-1 child seat helps to keep your child secure in a 5-point harness from 20-65 lbs. When the child is ready, it easily converts to a belt-positioning booster from 30-100 lbs. As they continue to grow, the Gavin grows with them, transitioning into either a high back or backless booster for a comfortable fit up to 100 lbs. This seat has been extensively crash tested, including side-impact testing and is outfitted with reinforced steel and thoughtfully designed with plush comfort features.

- 3-in-1 seat protects up to 100 lbs
- Top rated after extensive crash testing; meets and exceeds U.S. Safety Standard
- Attractive Simpson Racing logos and color scheme
- Wider, padded arm rests are extra comfy
- Easy to clean
- Easily adjust headrest with one hand
- Not an infant seat; not a rear facing seat
- Weight: 26 lbs
- 29"H x 20"W x 22"D (head rest in lowest position)

COLLIN ONESIE

CODE: 43010 | SIZES: Newborn, 6, 12, 18 and 24 mos. | PRICE: \$9.99

- So cute, soft and cuddly

NEW! AVAILABLE JANUARY, 2011

SERVICE EXEMPLIFIED

I couldn't be happier with my Simpson race suit! From start to finish, the service I received was top-notch, and Russ at Simpson even made it a point to get my suit done in time for a big race I had coming up. My two-layer suit is super soft and very comfortable and it fits me just right (and being a female, this is important!) Simpson did a great job on logo placement, embroidery and overall design of my suit – which not only made me happy, but made my sponsors happy as well. Plus, with Simpson's Molecule products, I can even wash my suit at home and help keep the cost of cleaning to a minimum.

Corry Weller – LOORRS Pro SR1 UTV #801

I've trusted Simpson Safety Equipment since the first race I competed in. In the 14 years since then, I've never trusted my safety to any other company, as Simpson's quality, comfort, and reliability is simply unmatched.

Paul Harraka – Racer

Thank you so much! After searching Canada and the US, the only open face helmet that would fit my pinhead was found by Kari in Texas. I needed it ASAP in order to be in the car this Friday. You moved heaven and earth and must have lit a serious fire way under, cause I ordered my brain bucket on Friday and holy moly it arrived today in Saskatoon SK Canada (and Monday was a holiday!!!). You have made this flatlander a very happy girl.

You have fabulous service in a world where even good service can be rare!
Thank you Kari.

Jodi Lant – Racer

Dear Simpson,

I want to thank you for your amazing products, for which I have seen their worth first hand. Earlier this season I had a crash in my Competition Eliminator C/DA which resulted in me upside-down on fire. However, thanks to my Simpson gear (jacket, pants, gloves, belts, helmet and neck collar) I came out unharmed. I feel very confident climbing into my dragster every round knowing that Simpson has my back!

Keep up the good work.

**Tyler Hogan
Comp #7023 C/DA
Hogan's Racing Manifolds**
